Two-Bearing 15

WINCO has over 95 years of power generation manufacturing. Our story begins in 1927, with wind generators. Two brothers in rural Iowa needed a way to charge their dry cell batteries for their radios.

Throughout the years, including a move to Minnesota, the company had evolved to WINCO Generators. We now provide a large variety of generators to suit practically every application in need of power.

We are a family and veteran-owned company, with over 80 employees and growing.
